ABOUT SAMBEET EQUIPMENTS PVT. LTD.

An ISO 9001:2008 Certified Company

Who We Are?

We feel privileged to be associated with globally recognized brands who have achieved the distinction of market leaders through their innovative solutions and quality products and services.

As authorized dealers for **ELGI EQUIPMENTS LIMITED, ATS-ELGI LIMITED, GREAVES COTTON LTD., JINDAL'S RECTIFIER, QUICKAIR COMPRESSED AIR PIPES** and **GODREJ**. We cater to their marketing, technical consulting, and logistics (including stocking) and after-sales services for the zone of Odisha and part of Chhattisgarh & Jharkhand. We constantly strive towards bringing you best in class products and services through our partners worldwide and our team located nearest to your sites, with over 7 branches in the state of Odisha, Chhattisgarh & Jharkhand.

Started on 1994

Started as an Small Sales Enterprise under the Guidance of Mr. Upendra Singh & Mrs.Sobha Singh in 1994

25 Years in Business

Leading Supplier of Equipments across Orissa for Over 25 Years with a Large Customer Base including Major PSUs

25% Yearly Growth

Registered a Consistent Growth of Over 25% every Year over last 5 Years with the Group Turnover exceeding INR 35 Crores

Branches in 3 states

Wide Coverage Across Industries throughout the State of Odisha, Chhattisgarh & Jharkhand

Dedicate Team

Dedicated Team of 50 Sales & Service Personnel to ensure 100% Customer Satisfaction

Our Infrastructure

Headquarters at Cuttack, Odisha

Sambeet Equipments Pvt. Ltd. Product Display Center is situated in the Hub of Cuttack's Commercial Belt at Link road, Badambadi. Sambeet Equipments Pvt. Ltd. Corporate Center is situated in the Hub of Cuttack's Serene Locale at Arunodaya Nagar.

Total Godown & Storage Area

Facilities We Provide

- Fully Equipped Guest House
- In-house Conference Room
- Boarding Facility for Staff Members
- Online sales and service reporting systems through our website
- Facilities like Fax, Scanners, Printers and phones available across the network
- Staff Seating Area with 26 Computer Terminals connected through VPN
- Fully Functional & Equipped Workshop with Resident Service Engineers
- Newest and Most Advanced Machineries available at Service Center

Service We offer !

Breakdown Services

Our service department consists of highly skilled factory-trained technicians who are kept up to date in the latest procedures. Our authorized technicians regularly attend factory schools and receive up to date bulletins on the newest methods of correctly maintaining your equipments. All technicians are trained to handle your emergency and trouble-shooting requirements.

Preventive Maintenance Contract

We will specify and execute a Preventive Maintenance Contract designed specifically to your business needs. Regular monitoring of system Performance, replacing the worn out spares, system checks and tune-ups and minor repairs all pre-scheduled and carried out without effort on your behalf. Preventive Maintenance contracting is your most cost effective route to reliable and long lasting compressed air systems.

Re-manufacturing

Our technicians are specialists in complete overhauls and re-conditioning of your equipments. Our re-manufactured systems are warranted by us to provide you with "like new" performance at a fraction of the cost.

New Installs And Upgrades

The quality equipment we sell, we also install. Whether you are upgrading or adding on to an existing system or starting from scratch with a new system either retro-fit or brand new facilities, then we have the expertise to professionally and reliably manage the job.

System Planning & Consulting

Involving the experts at Sambeet equipments pvt. Ltd. right from the planning stages will allow you to benefit from their years of experience, resulting in an effective, scalable and reliable solutions for your industrial needs.

Compressed Air Pipe line work

A compressed air system transfer's power in the form of air pressure. A device somewhere else in a workshop can use the energy the compressor creates. The component that connects everything together in a compressed air system is the piping.

The piping in your system can make or break the profitability of your enterprise. Lost power through inefficient or faulty piping can wipe out your profit margin and give your competitors an advantage.

We at Sambeet equipments private limited have experts who design and pay attention to the layout, installation and maintenance of your compressed air piping system to control costs and keep your business on track.

Disposal Assistance

Our engineers will help you to restrict your cost by reutilizing the reusable components to create cost effective replacement of spares in future.

Energy audits for air compressors

Compressed air is an expensive utility and its applications can be economically viable option only if it is used in a prudent manner. With over a half a century of research and innovation behind it, ELGi has developed deep domain knowledge and expertise in various aspects of the compressor, including the interplay between compressed air and energy usage. Our partnerships with global leaders in multi-dimensional fields have helped us put together systems that confirm to international standards of operation. Our innovative solutions and systems help our clients drastically reduce their process costs, apart from attaining improvements in product quality.

We extend our proven capabilities in compressor energy efficiency in carrying out energy audits for our customers. Energy audit is a specialized process that takes through knowledge and expertise in multiple fields. Our expert team of mechanical, electrical and instrumentation engineers offers a multi-dimensional view of a compressors energy usage. The team conducts audits and trains end users in key energy oriented functional areas.

We believe that there are four fundamental ways of saving energy:

- Accurate monitoring of the utilities in the plant.
- Reduction in the amount of energy required for the generation and use of the utility.
- Trapping of any unused energy.
- Recycling and use of energy over again.
- Customers see savings in their energy bill almost immediately after implementing our recommendations.

The audit reports prepared by the ELGi experts' team along with Sambeet Equipment Team include recommendations on short, medium and long-term measures for energy conservation, along with financial estimates and analysis for the implementation. The reports offer specifics into measurements and tests conducted at the customer sites. This is followed up by assistance in the implementation and performance monitoring of our energy conservation proposals.

Compressor Rental services

For short- or long-term demands, for planned contingencies or unexpected emergencies: you can rely on our compressors for an efficient industrial air supply – exactly how and when you need it. Our engineers design the most suitable temporary installation. A fast set-up and a cost- and energy-effective approach are part of the total package, all completely tailored to your specific application.

Compressed Air Piping System

Aluminium Piping

Quickair™ range of products innovatively designed systems that reduce installation time and cost without compromising quality, aesthetics, or reliability.

Piping System Fittings | Air Fittings

Our product range includes a wide range of quick plug ball valves, air preparation unit, aluminium pipe connector for compressed air .The product ranges are designed to perform flawlessly in a variety of applications and environments.

Modular Aluminium Piping Systems

Industrial Air Solutions LLP, offers a modular aluminium piping system for compressed air. These pipes are manufactured for installing compressed air distribution systems. The fittings and materials used help in offering a flexible system, which can also be integrated with all the systems of these products. Modular aluminum pipe for compressed air installations, offering both lower installation costs and lower long-term operating costs.

Pipeline system

The Quickair™ pipeline system has been designed and built for the installation of compressed air and inert gas distribution systems. The materials and types of fittings used offer a flexible system that can be integrated with all Quickair™ Systems and solve all the problems and meet all the requirements of even the most complex systems. Innovative technology at the heart of Quickair™ enables rapid and easy assembly, quick connection of components to the Aluminium pipes.

- Lower installation cost
- No corrosion
- 20mm-200mm dia pipe sizes
- Reusable fittings
- Push-Fit concept
- Powder Coated
- Modular design
- Easy to install

Quick air fittings

Quickair™ Fittings provides versatility of design and helps to overcome constraints often encountered with structure of industrial buildings.

Godrej Storage Solutions

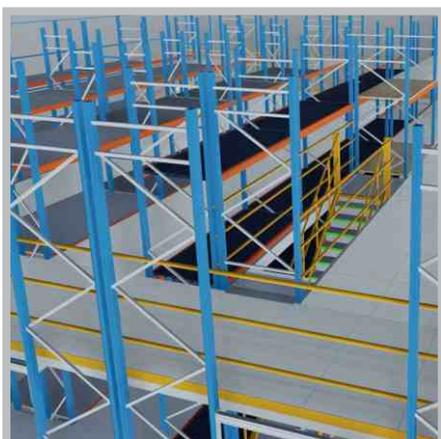

As pioneers and market leaders with over six decades in the field of intralogistics, we cater to storage, movement and management needs of warehouses and shopfloors in India and international markets. Over the past two decades, we have created a storage footprint of over 200 million square feet. These projects have given us great insight into our customer pain points whether urban or rural, giving us a unique perspective of on-ground realities.

Our diverse product and service portfolio includes pallet-racking solutions and shelving solutions for warehouse excellence, cloud-based warehouse management software for intelligent warehousing, shop-floor solutions for enhancing shop floor productivity and value-adding warehouse consulting.
