Crafted for
**Strength &
Reliability**

Customer Service Support !

Our customer service team is committed to keeping your rice mill running at peak efficiency.

We provide prompt support for spare parts selection, technical assistance, and troubleshooting. Whether it's urgent replacements or expert guidance, we ensure quick, reliable, and hassle-free service, helping you minimize downtime and maximize productivity in your milling operations.

Welcome to PAIS TECHNO SOLUTION PVT. LTD.

PAIS was established on 2024 with the vision of
“Precision, Performance & Partnership“

OUR APPROACH

We specialize in high-quality spare parts that keep your machines running and your operations smooth. With a legacy of excellence and a future focused on innovation, we are proud to be a trusted partner for OEMs, aftermarket suppliers, and industries around the globe.

Driven by technology and powered by expertise, we deliver spare parts that meet the highest standards of durability, accuracy, and reliability. Whether it's for automotive, industrial machinery, heavy equipment, or custom components, our commitment is to quality without compromise. was established on 2024 with the vision to manufacture best quality spare parts for the needs of verious milling machineries and other machineries.

OUR AIM

With a focus on customer, continuous improvement, and sustainable manufacturing, we aim to be more than just a manufacturer—we strive to be a strategic partner in your success.

Your Reliable
Partner in
Precision Parts

WHAT WE OFFER

- Advanced manufacturing facilities with imported machines from Germany & precision tooling. From machining to chemical processing & hardening is getting done under one roof by the experienced QC engineers.
- In-house R&D and reverse engineering capabilities.
- ISO-certified quality control systems.
- Custom and standard spare parts solutions.
- On-time delivery and responsive service.

SPECIFICATION

Ensuring product specifications & metallurgy of genuine spares.

Profile of the sieve slots are closely checked by profile projector to ensure the slot profile's accuracy which leads the suction of bran on a smooth way.

Screens are completely processed by Imported high precision machineries to minimize manufacturing errors. All casting materials are made by the best grade of material on investment casting to get the accurate design needs.

Machining of each material is followed by the industrial heat treatment process on Plasma Nitriding Furnace to minimise distortion of material and to ensure the best quality and maximize the self life of products.

All types of Sieves and Perforated Sheet

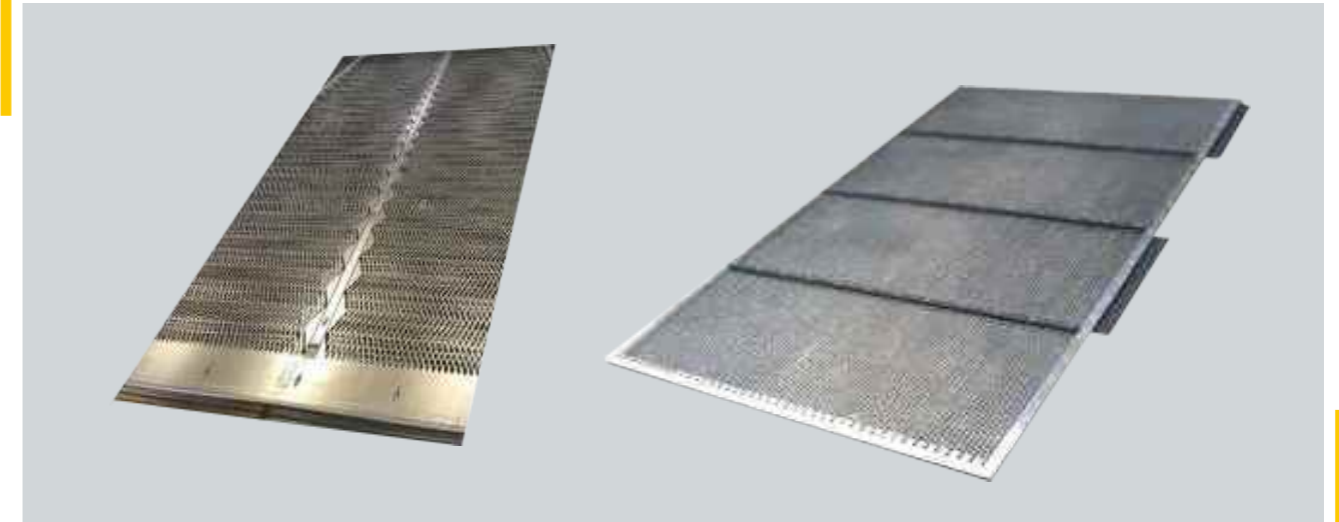

Features:

- Screens and Sieves for different rice whiteners and polisher models.
- Made by different materials to meet different requirements of price and quality.
- Can customize according to drawings or samples.
- The hole type, mesh size can be customized too.
- Prime materials, unique technique and precise design.

All types of Sieves and Perforated Sheet

All types of Camrolls

Features:

- Made from high-quality stainless steel material for durability and longevity.
- Precisely engineered and machined to ensure consistent and accurate milling results.
- Resistant to corrosion, rust, and wear, ensuring a long service life.
- Smooth and polished surface finish for efficient milling operations.
- High precision and dimensional accuracy for consistent and uniform product quality.
- Can be easily installed and integrated into milling machines or systems.
- Easy to clean and maintain, ensuring hygienic and contamination-free milling processes.
- Available in different sizes and configurations to meet specific milling requirements.
- Designed to withstand heavy-duty milling operations and maintain performance under demanding conditions.

FEED SCREWS & OTHER SPARES

All types of Feed Screws

We are a noteworthy organization, occupied in providing pristine quality range of Feed Screw. The offered screw is manufactured using supreme grade metal with the help of ultra-modern techniques in compliance with set industry norms. Moreover, it is checked for its quality on series of quality parameters before being supplied to our clients. We offer this screw to our clients in different sizes as per their necessities.

Features:

- Made from supreme-grade metal for durability and strength.
- Produced using ultra-modern techniques in line with industry norms.
- Checked against multiple quality parameters before delivery.
- Available in various sizes to meet client requirements.
- Designed for consistent functionality in feed applications.
